RESEARCH OBJECTIVE	Building intelligent software development automation systems by bringing together diverse fields like software analytics, machine learning, information retrieval and social networks.	
EDUCATION	Birla Institute of Technology & Science , Pilani	
	B.E. (Hons.), Computer Science , <i>Expected:</i> August 2018	
	<ul style="list-style-type: none">• <i>GPA: 9.68/10.0 and Major GPA: 9.73/10.0</i>• Top 1% of the university's students by GPA	
	M.Sc. (Hons.), Economics , <i>Expected:</i> August 2018	
	<ul style="list-style-type: none">• <i>Major GPA: 10.0/10.0</i>	
UNDERGRADUATE THESIS	PHASE 1: <i>Assessing the reviewability of code changes and automating the evaluation of GitHub Pull Requests</i>	<i>Aug '17 – Dec '17</i>
	<ul style="list-style-type: none">• Adviser: Prof. Alberto Bacchelli, University of Zurich	
	PHASE 2: <i>Empirical modeling of sentiments in code review discussions on collaborative coding platforms like GitHub</i>	<i>Jan '18 – May '18</i>
	<ul style="list-style-type: none">• Adviser: Prof. Mei Nagappan, University of Waterloo	
TEACHING	Teaching Assistant - Neural Networks & Fuzzy Logic	<i>Jan '17 – May '17</i>
	BITS F312 with Tirtharaj Dash , Department of Computer Science, Birla Institute of Technology & Science, Pilani	
	Teaching Assistant - Data Structures & Algorithms	<i>Jan '17 – May '17</i>
	CS F211 with Dr. A. Baskar , Department of Computer Science, Birla Institute of Technology & Science, Pilani	
EXPERIENCE	Research Intern, University of Waterloo	<i>Jan '18 – May '18</i>
	<ul style="list-style-type: none">• Worked with the Software Architecture Group and the Computational Health Informatics Lab on the THEMIS.COG project	
	Research Intern, Delft University of Technology (TU Delft)	<i>Aug '17 – Dec '17</i>
	<ul style="list-style-type: none">• Worked with the Software Engineering Research Group (SERG) on developing a pull request reviewability evaluation framework• Participated in courses on mining software repositories and software engineering methods	
	Software Developer Intern, Intuit Inc.	<i>May '17 – Jul '17</i>
	<ul style="list-style-type: none">• Developed a data engine for layout-based retrieval from the database• Built a reports engine that uses this data engine to provide performance insights for businesses• Approx. 400% faster compared to existing solutions due to parallel query evaluation	
	Research Intern, Indian Bank HQ	<i>May '15 – Jul '15</i>
	<ul style="list-style-type: none">• Developed environment sensitive time-series forecasting models for setting business targets	
RESEARCH PROJECTS	Detecting inconsistencies between Python code and comments	<i>Sep '17 – Nov '17</i>
	Advisers: Dr. A. Bacchelli , L. Pascarella	GitHub: achyudhk/PyFunc-Signature-Parser
	An analysis of type inconsistencies between source code and method docstrings in Python across popular Python libraries and building an automated tool to identify these inconsistencies.	
	Analysis framework for decoding online developer communities	<i>Dec '15 – May '17</i>
	Adviser: Prasad Talasila	GitHub: achyudhk/Mailing-List-Network-Analyzer
	An analysis of author interaction through community detection in mailing lists, IRC channels and Slack teams using a text mining based approach to identify topic experts and label communities, in order to examine the activity and decode the structure of the developer communities.	

Fitness-aware brokering of hosted containerized environments *Jan '17 – May '17*

Adviser: Dr. Santonu Sarkar

GitHub: [achyudhk/Fitness-Aware-Container-Brokering](#)

An integration agent that benchmarks and containerizes a SaaS catalog offering and a smart fulfillment engine that deploys it into the best-fit container out of a set of containers hosted on various underlying clouds. *In association with IBM Research Labs.*

Novel feature selection using Fuzzy C-Means clustering

Feb '17 – Apr '17

Adviser: Dr. Rajendra Roul

GitHub: [achyudhk/FCM-Feature-Selection](#)

Feature selection using cosine similarity scores on the semantic centroids calculated from the normalized term-term correlation factors based on Fuzzy C-Means clustering. Selected features resulted in comparable F-scores for classification compared to MI and χ^2

Semantic segmentation using a deconvolution network

Mar '17 – Apr '17

Neural Networks Course Project

Reference: [arXiv:1505.04366](#)

A deconvolution network that can identify Red Blood Cells in an input image by predicting a binary segmentation mask.

Video translation of American Sign Language gestures

Nov '16 – Dec '16

Machine Learning Course Project

GitHub: [achyudhk/Sign-Language-Recognition](#)

An ensemble classifier that applies hard negative mining and non-maximal suppression for localization, using histogram of gradients and local binary patterns as features. Achieved an accuracy of $\sim 99\%$ on localization and 96.8% on top-5 classification (IoU metric).

Identifying the trends in Indian Legislative issues using NLP

Aug '16 – Dec '16

Adviser: Dr. Anoop Kumar

GitHub: [achyudhk/Parliamentary-Debate-NLP](#)

Identification of latent structures within parliamentary debates using natural language processing to discover seasonal trends in the debates of the upper and lower houses.

Miscellaneous Projects

- Feed-forward Neural Network library using computational gate approach supporting multiple optimizers, common activation and loss functions
- Implementation of state of the art Deep Learning papers on Google SVHN and MNIST datasets
- Implementation of machine learning algorithms like Support Vector Machines, Principal Component Analysis, K-means Clustering, Fuzzy C-means Clustering in Python
- Design and implementation of MIPS single-cycle, multi-cycle and pipelined architectures
- Network Topology Simulation and Analysis using Wireshark, NS2, NAM, xGraph and AWK
- Multi-user chat service using socket programming with multicast and broadcast messages
- FTP client and server using socket programming
- BibTeX Parser and Code Beautifier for C using LEX and YACC
- Weather monitoring station design and simulation using μ -processor programming and interfacing

TALKS AND
PRESENTATIONS

Google Developer Group, Goa

- Leveraging the power of Virtualization, Docker and the Cloud

Apr '17

Department of Economics, BITS Pilani

- Monte-Carlo methods to assess the feasibility of biofuel production using simulation of economic models (Adviser: Dr. Rajorshi Sen Gupta) *Nov '15*
- Cross country analysis of statistical models for assessing the effect of economic factors on insurance penetration (Adviser: Dr. Aswini Kumar Mishra) *May '16*
- Rationality, uncertainty and cognition in financial markets – An experimental approach using double auction asset market simulation (Adviser: Dr. Anoop Kumar) *May '17*

SELECTED
COURSEWORK

Computer Science

Machine Learning, Neural Networks & Fuzzy Logic, Information Retrieval, Mining Software Repositories, Software Engineering Methods, Parallel Computing, Compiler Design, Computer Networks, Design & Analysis of Algorithms, Data Structures & Algorithms, Discrete Structures in Computer Science, Operating Systems, Computer Architecture, Principles of Programming Languages, Theory of Computation, Database Systems, Object Oriented Programming, Logic in Computer Science, Microprocessor Programming & Interfacing, Computer Programming, Digital Design

Mathematics

Multivariable Calculus, Linear Algebra, Differential Equations, Probability & Statistics, Advanced Econometrics, Mathematical & Statistical Methods

SKILL SET

Languages

C, C++, Python, Java, JavaScript, BASH, SQL, HTML, CSS

Frameworks

Amazon Web Services, Google Cloud Platform, Firebase, Docker, Scikit-Learn, Numpy, Matplotlib, NLTK, Gensim, Keras, NetworkX, Flask, Scikit-Image, Chart.js

AWARDS AND SCHOLARSHIPS

Institute Merit Scholarship — BITS Pilani

Aug '14 – May '18

Awarded six times for being ranked within the top 1% of the university's students by GPA

Bhushan Bhatia Graduate Application Scholarship — BITSAA

Feb '18

Awarded six times for being ranked within the top 1% of the university's students by GPA

Research Travel Grant — IPCD, BITS Pilani

Aug '17

Awarded in recognition of my senior thesis at TU Delft

HackAttack 2017 Runners-up — Intuit Inc.

Jun '17

Built *Foresight*, an Android app that uses object detection, realtime databases, and Google Places API to help the differently-abled navigate better

IUCAE Grant — Inter-University Centre for Alternative Economics

Apr '17

Awarded towards experimental work on *Rationality, Uncertainty and Cognition in Financial Markets* with Dr. Anoop Kumar

Duke of Edinburgh International Award — Bronze Category

Jul '13
